OphthaVision™ Digital Imaging

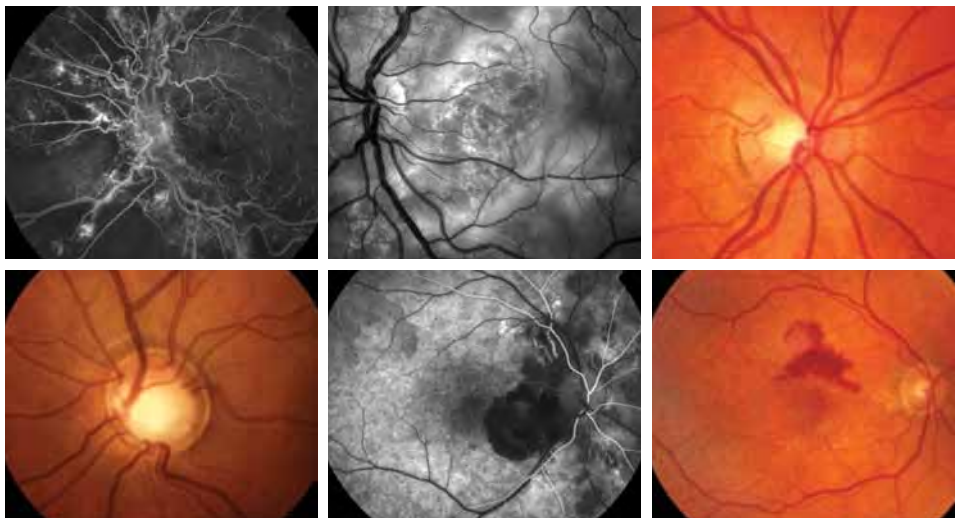

Outstanding Digital Imaging Without Compromise

Fundus Imaging

The quality and resolution of Sonomed Escalon digital fundus imaging systems let you realize the benefits of outstanding digital imaging without any compromises... The highest image quality available, intuitive and user-friendly interface, full array of analysis and measurement tools, scalable networking and connectivity, and more.

The efficient and powerful OphthaVision™ software incorporates patented image processing algorithms that optimize color and FA image quality for truly outstanding images.

OphthaVision™ digital fundus systems are compatible with most existing fundus cameras, and offer scalable and secure connectivity, that are easily networked and DICOM compatible.

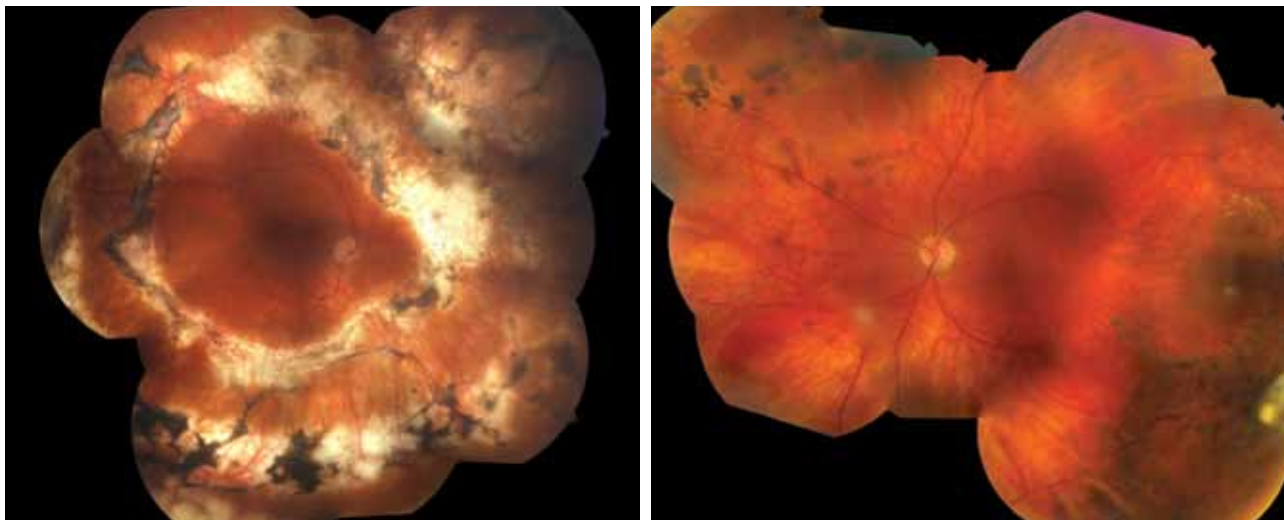

We offer a full range of solutions tailored to meet all your needs:

E5 Series
E6 Series
E11 Series

OphthaVision™

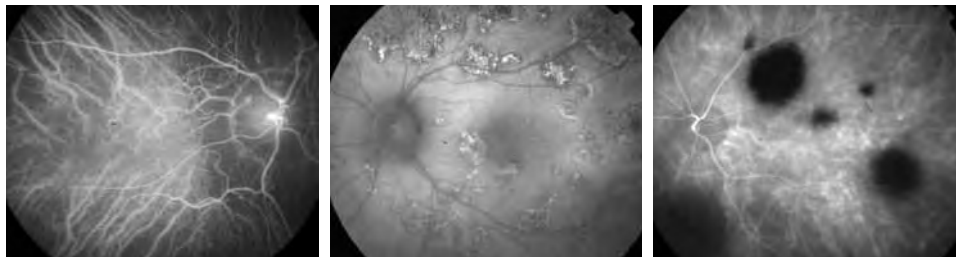

Feature-rich Sonomed Escalon OphthaVision™ imaging software is easy and efficient to use, ensuring a quick learning curve and streamlined patient flow. Intuitive and powerful tools give instant image availability for review, patient education, and treatment.

- Unique Patented Fundus Image Processing Algorithms Produce
- Unparalleled Image Quality
- Saves Time with Intuitive and Efficient Interface
- Scalable and Secure Connectivity, Easily Networked and DICOM Compatible
- Auto EyeMap Feature Creates Wide-Field Color-Corrected Panoramic Images
- Create Stereo Pairs and Side-by-Side Image Reviews at the Click of a Button
- Full Array of Tools to Enhance, Review, Analyze, Print, and Share Images

AutoFluorescence / ICG

Combined with the power of OphthaVision™ software, the Sonomed Escalon Autofluorescence and ICG solution is a complete imaging solution of exceptional quality. Sonomed Escalon Autofluorescence and ICG solutions offer outstanding images by utilizing specialized high-sensitivity imaging sensors. Patented image processing algorithms are used to reduce background noise and maximize signal-to-noise ratios, critical in low-light applications such as autofluorescence and ICG. The single camera package is extremely compact and connects directly to most fundus cameras.

Slit Lamp

The Sonomed Escalon Digital Slit Lamp Imaging System seamlessly captures high-resolution digital images from any photo slit lamp for documentation, presentation, and patient education. Whether connecting to a network, workstation, or portable laptop computer, the USB interface makes it easy and fast. Integrates with Sonomed Escalon OphthaVision™ software giving you the power to analyze, archive, and seamlessly integrate all of your slit lamp digital images with your other diagnostic images.

Sonomed Escalon OphthaVision Digital Imaging systems offer the very best in color fundus, fluorescein angiography, autofluorescence and ICG, and slit lamp digital photography. Outstanding image quality, efficient and easy to use interface, rock-solid reliability, and responsive and expert customer service set Sonomed Escalon apart. But don't just take our word for it; we would be happy to put you in touch with one of our many gracious clients to share their level of satisfaction.

"I think your system is the best one out there and we have field tested most of the others. In terms of color rendition, ease of use, software features, less need for post processing, OphthaVision and the cameras are the best."

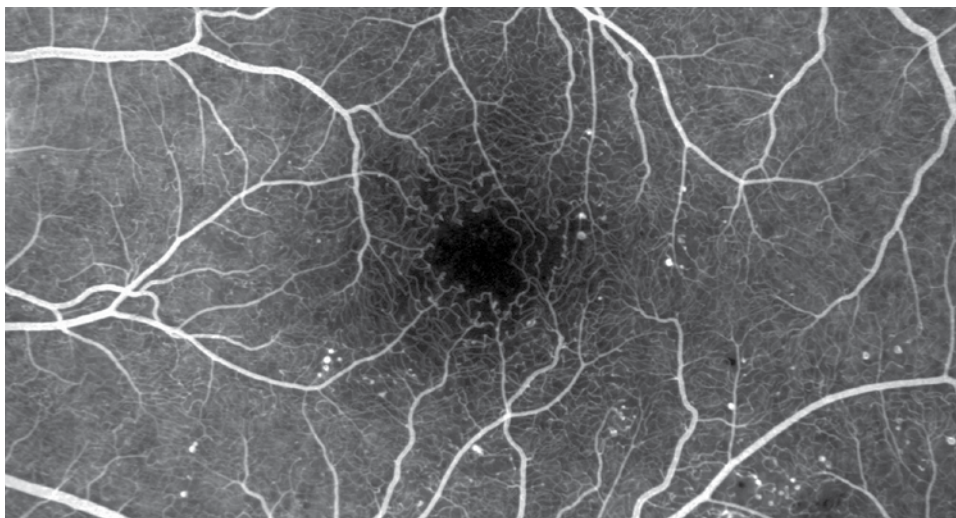

Jim Gilman, CRA
John A. Moran Eye Center
Salt Lake City, UT

"The equipment itself is great... but when combined with the knowledgeable staff to back it up, it rises to a whole new level of superiority. The customer support is willing to spend extra time as needed. I would not hesitate to recommend Sonomed Escalon to others."

George Velicky, O.D.
Omni Eye Services
Iselin, NJ

"Sonomed Escalon installed an E6 Dual system on my Zeiss FF4 fundus camera. I was extremely pleased with the information about the system and about digital fundus photography in general that was provided to me before I made the purchase. Now that I am using it, the performance of the system and the quality of the images have been superb. Technical support has been available, gracious, knowledgeable and patient. I am a very happy customer. "
