USB Cable

Mediview Image Process Software

FEATURES

Convenient Operation.

We have preset many camera setups so the user does not need to set many parameters before using the device.

The user can operate the machine directly once the installation has been finished.

The device carries following automatic functions for photo shooting and processing when equipped with our Mediview software:

Auto Focus · Auto Exposure · Auto Gain
Auto White Balance · Auto OS/OD Indicator

HDMI output

The HDMI output can be used to connect the slit lamp with monitor. The doctors can share the live eye examination status simultaneously with patient's family members or students for teaching purpose.

Adjustable Aperture

The aperture can be adjusted at 6 different levels to meet different view of depth and brightness demands.
