VITAL SIGNS

DIAGNOSTIC STATION

DS20

SCHILLER's DIAGNOSTIC STATION DS20 simplifies your daily work:

- ◇ Most vital signs and physical assessment tools united in one device
- ◇ Large, interactive touch screen
- ◇ Intuitive guidance and easy to use
- ◇ Highest diagnostic ECG quality at 32,000 Hz sampling rate

FAST AND EASY TO USE

The DS20 immediately detects connected sensors and automatically displays the corresponding value.

This fast operation allows for easy addition or removal of parameters.

ONE TOUCH TO THE MEASUREMENT

Simply touch the large, high-resolution color display and you are in business, recording and selecting the highest quality ECGs.

- ◇ Perform
- ◇ Review
- ◇ Store or export wherever you want

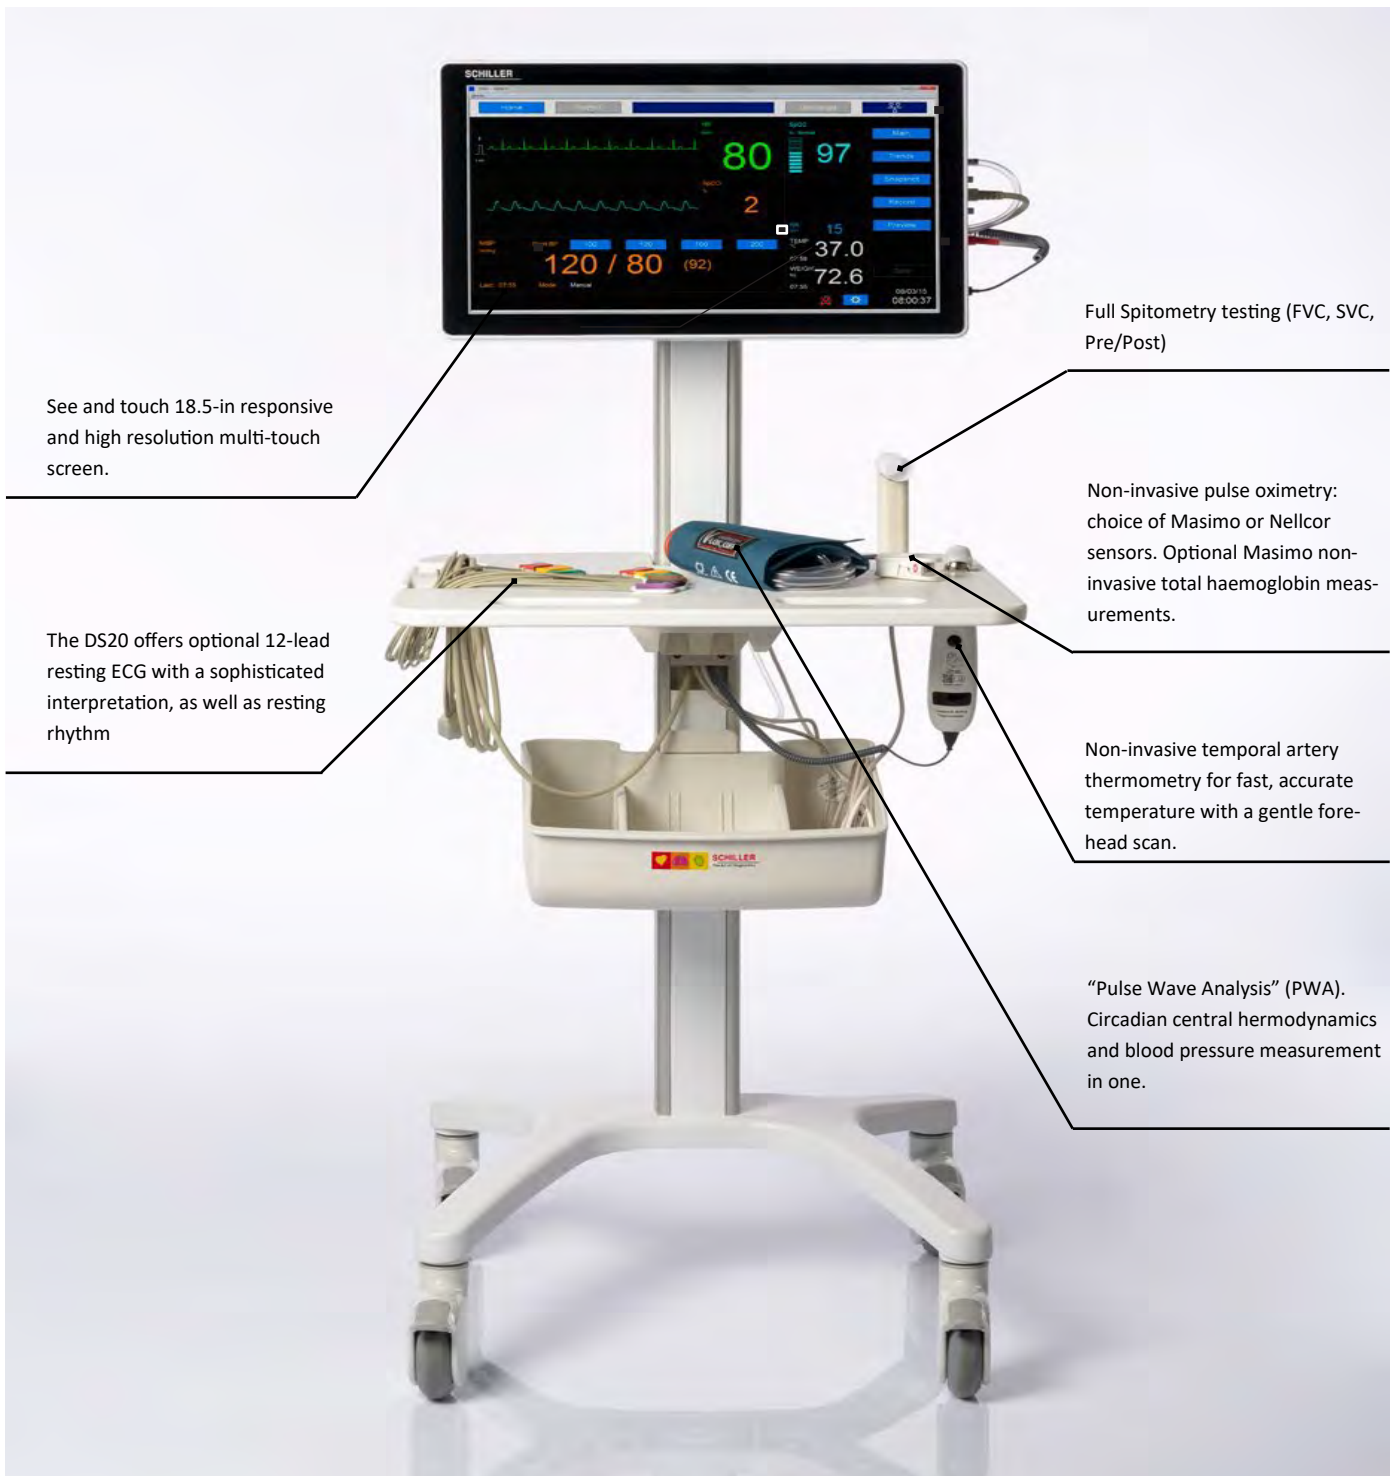

CONNECTED

The DIAGNOSTIC STATION DS20 is a networked device. Seamless connectivity to EMR, PACS, HIS or SCHILLER's

SEMA3 Cardiology Information System is possible and bidirectional communication allows for easy data access, while Wi-Fi with strong security enables direct and fast transmission.

EXPANDABLE

Easily add new functions and other devices or future technological developments. The DS20 is ready for the most common functions and will satisfy new requirements as they arise in your institution.

See and touch 18.5-in responsive and high resolution multi-touch screen.

Full Spirometry testing (FVC, SVC, Pre/Post)

The DS20 offers optional 12-lead resting ECG with a sophisticated interpretation, as well as resting rhythm

Non-invasive pulse oximetry: choice of Masimo or Nellcor sensors. Optional Masimo non-invasive total haemoglobin measurements.

Non-invasive temporal artery thermometry for fast, accurate temperature with a gentle forehead scan.

"Pulse Wave Analysis" (PWA). Circadian central hemodynamics and blood pressure measurement in one.
