

# Reichert *USG-Chek* Digital Refractometer

## Powerful performance in the palm of your hand!

### Compact, Powerful, Dependable, Accurate

The Reichert USG-Chek is a urine specific gravity refractometer ideally suited for the medical clinic. It also delivers fast and accurate hydration measurement in athletics, particularly wrestling. The USG-Chek is more accurate than hydrometers and test strips.

### Measures:

- Urine Specific Gravity (USG) from 1.000 to 1.040

### USG-Chek raises the bar for performance and value.

It's easy to operate and provides quick results. This LCD digital display is easy to read and removes the subjectivity of shadow line interpretation across a small scale used in conventional handheld refractometers. Reading errors are eliminated with the USG-Chek.

Measure urine specific gravity without placing the sample near your face as required with other optical manual models. This measurement is safer and more convenient.

### Save Money, Time, and Increase Productivity!

- **USG-Chek features a 5-digit, full view LCD screen that displays all pertinent measurement data in one view. This feature reduces the costs associated with reading errors and eliminates scrolling values.**
- **USG-Chek has an affordable cost of ownership. You can read over 10,000 measurements on two AAA batteries, which are included. The instrument has an automatic shutdown feature that preserves battery life.**
