

FAST - DRY - SAFE PERIOD

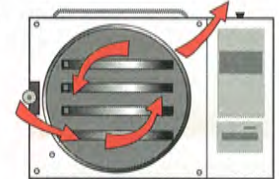

Simply put - another innovative idea from Tuttnauer.™

Double safety locking device prevents door from opening while chamber is pressurized.

At Tuttnauer, safety has always been our foremost concern. Tuttnauer engineers have designed a fast, safe digital autoclave that is second to none. The EA/EKA Autoclave, with its internal venting system, enhances drying after the sterilization cycle with the door closed. In just minutes your instruments will be dry.

Safety, speed and simplicity are the standard. Tuttnauer, dedicated to innovation, is constantly revolutionizing ways to simplify your sterilization needs.

With the safety of a closed door, Tuttnauer's EA/EKA circulates hot air after the sterilization cycle for fast drying.

tuttnauer™

Designed simply to be the best.

The EA/EKA, like all other Tuttnauer autoclaves, provides two years parts and two years on-site labor plus an optional two years parts and labor extended warranty. Tuttnauer designed simply to be the best.

AUTOMATIC PERIOD

- One touch operation - after the start button is depressed, the electronics control the total cycle.
- Door remains securely closed during dry cycle.
- Highly filtrated air introduced into the chamber during dry cycle.
- Significantly reduces total cycle times.
- Two years warranty on all parts, two years on-site labor. Extended warranty available.
- Optional printer available on all EA/EKA autoclaves for documentation and validation of your in-office sterilization procedures.
- All Tuttnauer autoclaves are A.S.M.E. stamped and U.L. approved.

With the safety of a closed door, Tuttnauer's EA/EKA circulates hot air after the sterilization cycle for fast drying.
